

FOR IMMEDIATE RELEASE

## Avid Organics Achieves REACH Registration for Glycolic Acid Portfolio, Strengthening European Market Access

Vadodara, Gujarat – November 8, 2025 – Avid Organics, India's leading manufacturer of glycolic acid and specialty chemical intermediates, announces the successful completion of REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) registration for its comprehensive glycolic acid product range.

REACH registration, administered by the European Chemicals Agency (ECHA), is mandatory for chemical substances manufactured in or imported to the European Union in quantities exceeding one tonne per year. The registration process requires extensive safety data compilation, hazard assessment, and risk characterization to ensure chemical substances meet EU health and environmental protection standards.

*"Achieving REACH registration for our glycolic acid portfolio represents a significant investment in regulatory excellence and customer service," said Dheeraj Jain, CEO & MD, Avid Organics. "This registration enables our European partners to source high-purity glycolic acid with full regulatory confidence, supporting their formulation requirements in quality-critical applications."*

Avid's glycolic acid range serves diverse applications including:

- Pharmaceutical industry: Excipient applications and intermediate synthesis requiring USP/EP compliance
- Personal care sector: Cosmetic-grade formulations for anti-aging skincare and professional treatments
- Industrial applications: Metal surface treatment, textile processing, and specialty cleaning formulations

The REACH registration encompasses multiple purity grades and concentrations, providing customers with comprehensive supply chain assurance for European operations. Avid maintains manufacturing facilities in Vadodara equipped with quality control systems aligned with international GMP standards, enabling consistent batch-to-batch performance.

### About Avid Organics

Established in 2007, Avid Organics is a specialized manufacturer and exporter of high-purity chemical intermediates and performance chemicals serving pharmaceutical, personal care, nutraceutical, agrochemical, and industrial applications worldwide. Operating from state-of-the-art facilities in Vadodara, Gujarat, Avid is India's largest manufacturer of glycine and glycolic acid, with an integrated product portfolio spanning Amino Acids, Carboxylic Acids & Esters, Aromatic Compounds, Performance Additives, and Specialty Ingredients.
